319-0607 Diesel Fuel Pump Technical File

1. 319-0607 Diesel Fuel Pump Introduction

1.1. 319-0607 Diesel Fuel Pump Basic Information

Title	Common Rail 319-0607 Diesel Fuel Pump C7 Series	Quality
SKU1	Z1WL10003190607	Re-manufactured
SKU2	Y1JD80003190607	Original New
SKU3	Z1K30003190607	Re-manufactured
SKU4	Z1BK1003190607	Re-manufactured
SKU5	T1000CAT3190607	Re-manufactured

1.2. 319-0607 Diesel Fuel Pump Common Part Number

(1) Diesel Fuel Pump Exchange Information

Diesel Fuel Pump Part Number	Universal Number
319-0607	20R-0819

(2) Diesel Fuel Pump Application Information

Vehicle Brand	Car Model	Engine Model	Production Date	Power (KW)	Horse Power	Emission (L)	Cylinder	Power Source (V)
/	/	966D	/	/	/	/	/	/

(3) Diesel Fuel Pump's Common Writing Methods

319-0607, 3190607, 319-0607

1.3. 319-0607 Diesel Fuel Pump Parameters

Diesel Fuel Pump Adaptation System: Common Rail System

Diesel Fuel Pump Series: C7 Series

Diesel Fuel Pump Type: HEUI System

1.4. 319-0607 Diesel Fuel Pump Specifications And Dimensions

Diesel Fuel Pump Size: 33cm* 33cm *28 cm

Diesel Fuel Pump Net Weight: 8.5kg

Diesel Fuel Pump Gross Weight: 9kg

Diesel Fuel Pump Quality: Original New/Re-manufactured

Diesel Fuel Pump Package Size: 36cm*36cm *30 cm

Diesel Fuel Pump Type: High Pressure Diesel Fuel Pump

Diesel Fuel Pump MOQ: 1 piece

1.5. 319-0607 Diesel Fuel Pump Quality Control

(1) Diesel Fuel Pump Testing

All parts of the diesel fuel pump have undergone electrical characteristics testing, precision testing, high temperature testing, low temperature testing, withstand pressure testing, leakage testing, durability testing, and various working conditions testing.

(2) Diesel Fuel Pump Installation

In addition, the diesel fuel pump production and installation process is quality controlled. Our company strictly follows the standard product installation data and product installation steps for installation, such as diesel fuel pump stroke test, diesel fuel pump solenoid valve tightening torque, diesel fuel pump tightening torque.

(3) Diesel Fuel Pump Inspection

The factory inspection of the diesel fuel pump has undergone three inspections: full inspection, random inspection, and batch inspection. Different brands of test benches are used to test the same diesel fuel pump for a total of no less than three times for factory inspection, and the fuel injector installation testing environment are progressed in dust-free workshop.

1.6. 319-0607 Diesel Fuel Pump Customization Service

(1) Diesel Fuel Pump Customization Service Coverage: Meet OEM manufacturers' customization needs for shell engraving, logo engraving, diesel fuel pump internal packaging, diesel fuel pump external packaging and labels, etc.

NO.	1	2
Picture		
Name	Diesel Fuel Pump Shell Engraving	Diesel Fuel Pump Packaging

(2) Diesel Fuel Pump Customization Service Requirements:

The purchase of customized diesel fuel pump is no less than **10** pieces.

The purchase of customized diesel fuel pump boxes is no less than **1000** pieces.

⚠ **Customized products involve the need of specify logo, the OEM manufacturer needs to provide trademark authorization and the sample of logo image file.**

⚠ **Once the customized diesel fuel pump is sold, it can't be returned or exchanged if there is no quality problems.**

1.7. 319-0607 Diesel Fuel Pump Packaging List And Packaging Dimensions

(1) Diesel Fuel Pump Parts List

NO.	1	2	3
Picture			
Name	Diesel Fuel Pump Assembly	Blue Anti-Rust Bag	Lining
Description	Fuel pump part number: 319-0607	Prevent diesel fuel pump from rusting	Prevent the diesel fuel pump from being damaged by external forces
NO.	4	5	6
Picture			/
Name	Diesel Fuel Pump Packaging Box	Diesel Fuel Pump Protective Cover	/
Description	Place the diesel fuel pump and accessories	Protect the diesel fuel pump hole from contamination and blockage	/

⚠ Minors are prohibited from using the diesel fuel pump assembly, O-ring, Oil inlet protective cover, diesel fuel pump shell protective cover, oil return protective cover, VCI anti-rust bag, and bubble bag to avoid personal injury.

⚠ O-rings and repair kits are one-time installation accessories and need to be replaced when installed again.

⚠ Oil inlet protective cover, diesel fuel pump shell protective cover, and oil return protective cover are recyclable accessories and can be reused.

⚠ VCI anti-rust bags and bubble bags are non-degradable materials, please dispose of them properly after using.

⚠ The diesel fuel pump and the installation part duct must be treated with appropriate sealing oil during installation.

(2) Diesel Fuel Pump Packaging Box Size

Pic No.1

NO.	Name	Diesel Fuel Pump Packaging Size (Cm)
1	Diesel Fuel Pump Packaging Box	36*36*30

1.8. 319-0607 Diesel Fuel Pump Testing Standards and Certificates

www.topdieselpump.com can provide the factory quality inspection test report of each diesel fuel pump to ensure that each diesel fuel pump delivered meets the engine performance indicators.

1.9. 319-0607 Diesel Fuel Pump Warranty Instructions**(1) Product Warranty Conditions And Instructions**

It is necessary to provide pictures, videos, or test reports tested by the diesel fuel pump inspection equipment when the diesel fuel pump is abnormal during use as evidence to feed back to the salesman. Abnormal conditions are properly explained such as: 1.Smoke, 2. Engine shake, 3. Difficulty starting the engine, 4. Engine noise, 5. Oil leakage etc.

(2) Diesel Fuel Pump Warranty Coverage

- ① After customer receives the 319-0607 diesel fuel pump within 15 days , if there is a performance failure and the product has no damage on surface, customer can choose to replace it or repair it;
- ② If the 319-0607 diesel fuel pump has performance problems during the warranty period (6-12 months), and it is confirmed to be product's problems after being tested, you can contact our salesmen to replace the same model or a reworked product with the same performance for free;
- ③ If the diesel fuel pump shell has obvious scratches, it can only be repaired and it will be returned as it is if the product is confirmed to be fault-free.

⚠ Tips: For products not covered by warranty, our company can provide paid maintenance services. For products after paid repaired, the same performance problem will have a free warranty period within 3 months from the date of repairing.

(3) Diesel Fuel Pump Is Not Covered By Warranty

- (1) The warranty period has expired.
- (2) Diesel fuel pump failure caused by high temperature, high pressure, humidity, rain and snow, saline-alkali land, earthquake, and used in abnormal environment.
- (3) Customer disassembles or repairs the diesel fuel pump personally resulting in damage to the diesel fuel pump.
- (4) Diesel fuel pump damage caused by man-made reasons (throwing, strong magnetic field magnetization, set fire).
- (5) Diesel fuel pump failure or diesel fuel pump damage caused by non-diesel fuel pump design, technology, manufacturing, quality and other issues.
- (6) Diesel fuel pump failure due to system pressure exceeding system approved pressure.
- (7) Diesel fuel pump failure caused by system voltage exceeding approved voltage.
- (8) Diesel fuel pump failure caused by impurities (water, lead, aluminum powder, iron powder, sulfide) in the system fuel exceeding the standard requirements.
- (9) Diesel fuel pump failure caused by not installing according to the tightening torque specified in the vehicle engine maintenance manual (the tightening torque is too large or too small).
- (10) Diesel fuel pump failure caused by not following the installation angle specified in the vehicle engine maintenance manual.
- (11) Diesel fuel pump failure caused by not following the cleaning requirements specified in the vehicle engine maintenance manual.
- (12) Diesel fuel pump failure caused by failure to replace consumable parts as specified in the vehicle engine maintenance manual.
- (13) Diesel fuel pump failure caused by not complying with the intake system fit clearance and exhaust system fit clearance requirements specified in the vehicle engine maintenance manual.
- (14) Failure to replace the consumable parts and the fitting clearance of the oil inlet system pipeline and the diesel fuel pump connection in accordance with the fuel intake system specified in the vehicle

engine maintenance manual.

2. 319-0607 Diesel Fuel Pump Technical Support

2.1. 319-0607 Diesel Fuel Pump Utilized Location

(1) Example: The code of the diesel fuel pump is shown as follows

NO.	Name
A	brand, logo, part number

Pic No.3

2.2. Reasons of 319-0607 Diesel Fuel Pump Not Working Normally

- (1) There is air in the oil circuit of the engine fuel system.
- (2) Vehicle diesel fuel pump oil supply system is not normal.
- (3) Engine common rail system oil leakage or pressure limiting valve damage.
- (4) There is a short circuit, cutting out and poor contact in the wiring harness connected to the diesel fuel pump of the vehicle.
- (5) The long-term placement of the diesel fuel pump causes the anti-rust oil to solidify, and the internal components are stuck or the oil holes are blocked.

⚠ Before installing, carefully check whether other components in the common rail system are damaged so as to prevent the diesel fuel pump from not working properly after being replaced.

2.3. Causes of 319-0607 Diesel Fuel Pump Being Damaged

- ① Failure to follow the Diesel engine maintenance manual during disassembly or installation may result in damage to the diesel fuel pump.
- ② The fuel oil used for the vehicle does not meet the standard cause damage to the diesel fuel pump, such as: the water content in the fuel oil exceeds the standard, iron powder, aluminum powder, sulfide impurities exceed the standard, etc.
- ③ The engine is not regularly maintained according to the engine maintenance manual (please refer to the vehicle maintenance manual for the maintenance mileage). For example, failure to replace the lubricating oil of the engine system for a long time will cause abnormal wear of the engine, excessive exhaust gas volume or a large amount of carbon deposits inside the engine. The filter is not replaced during maintenance or the replaced filter cannot reach the original filter standard. all above reasons can cause damage to the diesel fuel pump.
- ④ The abrasion of the oil pump produces iron powder and aluminum powder enter the diesel fuel pump and cause damage to the diesel fuel pump.
- ⑤ The deformation and abrasion of fuel tank result in iron powder or aluminum powder entering the diesel fuel pump and causing damage to it.
- ⑥ The diesel fuel pump is damaged due to replacement or adjustment of the relevant parts of the diesel fuel pump. For example, the valve clearance does not meet the standard after the engine is repaired, the replacement or modification of the wiring harness connected to the diesel fuel pump fails to meet the original standard.
- ⑦ The engine is overheated and overloaded for a long time working results in damage to the diesel fuel pump.
- ⑧ The diesel fuel pump will be damaged naturally at the end of its working life.
- ⑨ The diesel fuel pump is magnetized (diesel fuel pump parts' magnetic exceeded) causing the diesel fuel pump to not work properly.

⚠ Before replacing the diesel fuel pump, please check the engine parts carefully according to the engine maintenance manual to avoid the diesel fuel pump being damaged again after replacement.

2.4. 319-0607 Diesel Fuel Pump Installation

(1) 319-0607 Diesel Fuel Pump Installation Precautions:

(1) The replacement of the diesel fuel pump must strictly follow the electrical system, the approved pressure of the low-pressure fuel intake system, the approved pressure of the high-pressure fuel circuit system, and fuel system replacement consumables requirements (including the low-pressure fuel circuit system filter and the high-pressure fuel circuit) specified in the vehicle engine maintenance manual.

(2) When install the diesel fuel pump, strictly follow the manual of replacement of wearing parts of the fuel system, cleaning requirements for the connection between the fuel system and the diesel fuel pump, the fitting clearance of the diesel fuel pump connection, the installation angle and tightening torque of the diesel fuel pump, the fitting clearance of the intake system, and the fitting clearance of the exhaust system, so that to ensure the service life of the engine and the normal operation of the diesel fuel pump.

(3) When installing the diesel fuel pump on the engine, it is necessary to clean the engine block, cylinder head and other parts connected to the diesel fuel pump, and ensure that there is no dust, carbon

deposits, water, rust spots, etc.

(4) If don't replace new washer shim, it can lead to: deformation of diesel fuel pump, oil leakage and air leakage, which will cause serious damage to the diesel fuel pump and diesel fuel pump to break and cause damage to the engine.

(5) When installing the diesel fuel pump on the engine, please carefully check the components related to the installation of the diesel fuel pump are not deformed, such as the diesel fuel pump pressure plate, screw, diesel fuel pump rod and other accessories, and install it in strict accordance with the operation steps of the engine maintenance manual.

(6) It is forbidden to operate the bare diesel fuel pump for a long time in an environment with serious dust pollution and corrosion to iron products.

(7) It is forbidden to operate the bare diesel fuel pump for a long time in a strong magnetic field environment.

2.5. 319-0607 Diesel Fuel Pump Storage Standards

(1) Choose a suitable storage place

The warehouse and cargo yard where the diesel fuel pumps are stored should be kept clean and dry, and away from the factory buildings that generate harmful gases and dust; do not mix with acid, alkali, salt and other substances; the storage place should have a good drainage system; the cargo yard should be flattened with gravel or furnace ash etc. to enhance the water permeability of the surface layer to keep the reservoir area dry.

(2) Strict storage requirements

Strict inspections should be carried out when the diesel fuel pumps are put into storage, the surface cleaning work should be done well to remove water traces, oil stains, ash and other dirt, remove the rust and do anti-rust treatment in time. Packaged diesel fuel pumps must be protected from damage.

(3) Keep the warehouse dry and do moisture-proof work

The relative humidity is usually below 70% for the diesel fuel pumps placed in the room, and the corrosion of the diesel fuel pumps is significantly reduced.

Fuel pumps must be stored in the warehouse, and they are forbidden to store in the same warehouse with commodities with high water content.

(4) Reasonable stacking

After the diesel fuel pump is exposed to rain, the corrosion rate will increase significantly. The purpose of sealing is to isolate the diesel fuel pump from rainwater and humid air, so the warehouse window should be checked in time to avoid rainwater entering the warehouse.

If the diesel fuel pump package is damaged, it should be repaired or replaced; when the package is damp, the packaging material should be dried; if the original anti-corrosion and oil applied at the factory is found to be damaged or dried up, it should be cleaned and re-applied oil in time.

⚠ It is forbidden to leave the diesel fuel pump exposed in the air for a long time.

⚠ It is forbidden to store acid, alkali, salt and other substances together with the diesel fuel pump.

⚠ The unpacked diesel fuel pump must be rust-proof during secondary storage.

2.6. 319-0607 Diesel Fuel Pump Technical Support Obtaining Methods

- (1) Diesel Fuel Pump Technical Data: <https://www.topdieselpump.com/download/>
- (2) Diesel Fuel Pump Technical Videos: <https://www.topdieselpump.com/videos/>
- (3) Diesel Fuel Pump Encyclopedia: <https://www.topdieselpump.com/category/news/encyclopedia/>

3. 319-0607 Diesel Fuel Pump Purchase And Delivery

3.1. 319-0607 Diesel Fuel Pump Purchase And Payment Term

Payment Method: T/T, Paypal, Alipay, WeChat

 Please contact our salesmen for specific payment information.

3.2. 319-0607 Diesel Fuel Pump Main Sales Markets

Main Sales Markets Of Diesel Fuel Pump: Asia, Europe, North America, South America, Africa etc.

3.3. 319-0607 Diesel Fuel Pump Declaration Requirements

We can assist customers by providing the following documents for import customs clearance: contract, invoice, packing list, bill of lading, insurance policy, certificate of origin, etc.

3.4. 319-0607 Diesel Fuel Pump Shipping Ways

Destination in China areas: SF Express, Debon Express, the corresponding logistics company can be provided according to customer requirements in special cases.

Destinations out of China's areas: DHL, UPS, FedEx, TNT air, ocean or other shipping methods required by customers.

3.5. 319-0607 Diesel Fuel Pump Delivery Time

Delivery Time: Send out within 3 – 7 working days after receiving payment (Except for special products and special cases).

3.6. 319-0607 Diesel Fuel Pump Logistics Time for Destination Out of China's Areas

DHL Logistics Time:

Place Of Departure	Hong Kong	Other Countries Or Regions In Asia	Australia and New Zealand	Europe	America	Other Countries
China Mainland	7 Days	7 Days	8 Days	8 Days	8-12 Days	7-10 Days

UPS Logistics Timeliness: Country or region of origin: Mainland China

Country of Destination	Estimated Arrival Time	Country of Destination	Estimated Arrival Time	Country of Destination	Estimated Arrival Time
Japan	3 Days	Britain	5-7 Days	Egypt	5-7 Days
Turkey	5-7 Days	Singapore	3 Days	Switzerland	5-7 Days
Bahrain	5-7 Days	Latvia	7-10 Days	New Zealand	7-10 Days
Sri Lanka	5-7 Days	Thailand	3 Days	Austria	5-7 Days

Romania	5-7 Days	Vietnam	3-5 Days	Estonia	5-7 Days
Malaysia	3-5 Days	Israel	5-7 Days	Mexico	7-10 Days
France	5-7 Days	USA	5-7 Days	United Arab Emirates	5-7 Days
Italy	5-7 Days	Netherlands	5-7 Days	Bengal	7-10 Days
Lebanon	5-7 Days	Philippines	3-5 Days	Greece	7-10 Days
South Korea	3 Days	Spain	5-7 Days	Myanmar	5-7 Days
Canada	5-7 Days	Germany	5-7 Days	Saudi Arabia	7-10 Days
Portugal	5-7 Days	Australia	5-7 Days	South Africa	7-10 Days
Denmark	5-7 Days	Belgium	5-7 Days	Ukraine	7-10 Days
India	7-10 Days	Qatar	7-10 Days	Poland	5-7 Days
Indonesia	3-5 Days	Morocco	7-10 Days	Pakistan	7-10 Days
Kuwait	7-10 Days	/	/	/	/

⚠ The logistics time is for reference only, subjects are according to the actual arrival.

3.7. 319-0607 Diesel Fuel Pump Shipping Package

Domestic express packaging: Usually wrapped in waterproof scotch tape, such as picture No.1.

International express packaging: Wrapped with waterproof yellow tape after wrapping the black protective film, such as picture No. 2.

Pallet Shipping: Use fumigation free and recycling trays that meet export requirements, and use white wrapping protective film to wrap and bind with cable ties for the outside, such as picture No. 3, also, the products can be packaged according to customers' requirements.

⚠ The packing tray is made of plastic and can be recycled.

⚠ Transparent tape, yellow tape, black wrapping protective film, white wrapping protective film are non-degradable materials, please dispose of them properly.

⚠ Minors are prohibited from using transparent tape, yellow tape, black wrapping protective film, and white wrapping protective film to avoid personal injury.
